℞

Sterile Co-Trimoxazole Concentrate BP

AMERICAN COTRIXOLE Injection

DESCRIPTION

Sterile Co-Trimoxazole Concentrate BP (Cotrixole Injection) contains two different antibiotics called sulfamethoxazole and trimethoprim, which is used to treat infections caused by certain bacteria.

Composition :

Each 5ml contains :

Trimethoprim IP	80 mg
Sulphamethoxazole IP	400 mg
Benzyl Alcohol IP	1%v/v
Water for Injections	Q.S.

Pharmacological Form

Solution for Infusion. A clear liquid.

INDICATIONS AND USAGE

- Acute uncomplicated urinary tract infection
- Treatment and prevention of Pneumocystis jirovecii pneumonitis or "PJP"
- Treatment and prophylaxis of toxoplasmosis
- Treatment of nocardiosis

CONTRAINDICATIONS

- Hypersensitivity to the active substance(s) sulphonamides & trimethoprim
- Patients with severe impairment of liver function
- In severe renal insufficiency where repeated measurements of the plasma concentration cannot be performed.

WARNINGS & PRECAUTIONS

- **Cotrixole Injection** should not be given to patients with a history of drug-induced immune thrombocytopenia with use of trimethoprim and/or sulphonamides.
- **Cotrixole Injection** should not be given to patients with acute porphyria.
- **Cotrixole Injection** should not be given to infants during the first 6 weeks of life.
- Patients should be advised of the signs and symptoms and monitored closely for skin reactions.

POSSIBLE SIDE EFFECTS

Like all medicines, this medicine can cause side effects, although not everybody gets them.

Tell your doctor or nurse immediately if you notice any of the following:

- Nausea
- Vomiting
- Loss of appetite
- Diarrhea
- Joint or muscle pain
- Pain or irritation at the site of injection
- Swelling of the hands, feet, ankles, face, lips and mouth or throat
- Severe blistering of the skin.
- Unexpected worsening of cough and shortness of breath.
- Sudden headache or stiffness of your neck, accompanied by fever

OVERDOSAGE

Symptoms and Signs

The maximum tolerated dose in humans is unknown.
Nausea, vomiting, dizziness and confusion are likely symptoms of overdosage. Bone marrow depression has been reported in acute trimethoprim overdosage.

INTERACTIONS

Cotrixole Injection may interact with other medications

DOSAGE AND ADMINISTRATION

Cotrixole Injection comes as a solution (liquid) to be mixed with additional liquid to be injected intravenously (into a vein)
Cotrixole Injection will be given to you only by a doctor or a nurse. Your doctor will decide the dose and frequency of **Cotrixole Injection** depending on the severity of your existing condition and another comorbidity.

PRESENTATION
