

HOW TO USE NUMBON-ADR INJECTION

Your doctor or nurse will give you this medicine. Kindly do not self administer.

HOW NUMBON-ADR INJECTION WORKS

Numbon-ADR Injection is a combination of five medicines: Lidocaine, Adrenaline, Sodium Chloride, Sodium Metabisulphite and Methylparaben. Lidocaine is a local anesthetic which works by blocking pain signals from the nerves to brain which decreases the pain sensation. Adrenaline is a vasoconstrictor which narrows the blood vessels to prolong the action of Lidocaine. This also controls bleeding during the procedure and minimizes side effects of Lidocaine. Sodium Chloride is a purified salt solution which helps prevent edema (swelling) and discomfort on injection. Sodium Metabisulphite and Methylparaben are preservatives.

PRODUCT INTRODUCTION

Numbon-ADR Injection is a local anesthetic. It is used to numb tissues in a specific area. It decreases the pain sensation by blocking the pain signals from the nerves to the brain.

NUMBON-ADR Injection is given by a doctor or a nurse and should not be self-administered. The dose and duration will depend on what you are taking it for and how well it helps your symptoms.

This medicine may cause few common side effects such as pale colored skin, burning sensation, stinging sensation, erythema, itching. If you experience any such side effects that does not go away or get worse, you should let your doctor know. Your doctor may be able to suggest ways of preventing or reducing the side effects. In general, you should try to use the smallest amount necessary to control your symptoms.

Before using the medicine, you should tell your doctor if you have any other medical conditions or disorders such as kidney or liver disease. It may also affect, or be affected by, some other medicines you are using so let your doctor know all the other medicines you are taking. Pregnant and breastfeeding women should consult their doctors first before using the medicine.

USES OF NUMBON-ADR INJECTION

Anesthesia

BENEFITS OF NUMBON-ADR INJECTION

In Anesthesia

Numbon-ADR Injection is a local anesthetic that stops pain by producing a feeling of numbness at the site of injection. It works quite quickly and will reduce discomfort caused by surgical or diagnostic procedures. It also does not cause swelling at the site of injection. **Numbon-ADR** Injection is given by doctor or nurse in a clinic or hospital.
